# Mustafa Khan

Senior Backend Engineer (.NET) | Distributed Systems | APIs | AI-Assisted Development

khanmustafa057@gmail.com Mumbai, India +91 7738922873 linkedin.com/in/mustafa-khan-1650a4147/ github.com/khanmustafa

## Profile

Senior Backend Engineer with 7 years of experience designing scalable APIs, enterprise applications, and high-performance backend systems using C#, .NET Core, SQL Server, and PostgreSQL. Proven expertise in airline booking platforms, payment integrations, pricing engines, GDS/NDC integrations, and production optimization. Passionate about building reliable distributed systems and leveraging AI-assisted engineering to accelerate software delivery, improve code quality, and enhance developer productivity.

## Core Skills

**Backend:** C#, .NET Core, ASP.NET Core, REST APIs, Microservices

**Data:** SQL Server, PostgreSQL, Entity Framework Core, LINQ

**Cloud & DevOps:** Microsoft Azure, Azure App Service, Azure Functions, Azure Key Vault, Azure DevOps, CI/CD Pipelines, Docker

**Frontend:** React.js, Angular, JavaScript

**Architecture:** API Design, Distributed Systems, Performance Optimization, System Integration

**AI:** Generative AI, Prompt Engineering, Github Copilot, Claude Code

## AI Engineering

Applied Generative AI throughout the software development lifecycle for requirement analysis, debugging, code reviews, documentation, refactoring, and technical research. Conducted internal knowledge-sharing sessions on responsible AI usage, prompt engineering, and engineering productivity.

## Education

**B.E. Computer Engineering** Aug 2014 – Jun 2018
*AIKTC* Navi Mumbai, India

## Certifications

**Technical:** C#, ASP.NET, MS SQL Server – Naresh i Technologies

**Security:** OWASP Threats Fundamentals

**Delivery:** Agile Masterclass

## Professional Experience

**Senior Software Engineer** Jul 2022 – Jul 2026
*ISA (Air Arabia)*

- Designed scalable flight-grouping and RBD mapping logic to improve fare comparison, pricing accuracy, and booking consistency.
- Improved flight search and booking performance by over 30% through backend optimization and SQL tuning.
- Integrated Amazon Payment Services with secure recurring payment workflows for online booking transactions.
- Developed GDS/NDC integrations supporting airline shopping, booking, ticketing, SSR processing, and ancillary services.
- Automated bulk onboarding and booking processes, reducing manual effort by 90%.
- Automated visa refund tracking, eliminating manual checks through data scraping.
- Integrated STAX ERP with airline booking systems to automate accounting and operational processes.
- Collaborated across cross-functional teams to deliver production releases and resolve critical customer issues.
- Led AI adoption initiatives by conducting engineering sessions on AI-assisted development, debugging, documentation, and productivity.

**Software Engineer** Jun 2021 – Jul 2022
*GEP*

- Delivered and enhanced enterprise application features using .NET Core and Angular within regular release cycles.
- Delivered new business features while maintaining application reliability across production releases.
- Diagnosed production incidents, optimized performance, and reduced recurring application issues.
- Collaborated with QA, DevOps, and business teams to ensure successful deployments.

**.NET Developer** Sep 2019 – May 2021
*Infohybrid Solutions*

- Built flight-booking and B2B travel-platform capabilities covering end-to-end booking workflows.
- Designed performant database schemas and implemented coupon and pricing modules for dynamic fare-handling requirements.

## Technical Focus

**Backend:** API development, database design, performance optimization, production support, and release delivery.

**Domain Experience:** Flight search, pricing, booking, ticketing, fare logic, GDS/NDC integrations, SSR handling, and payment workflows.
